

# CABLING BUSHES

A range of bushing products that protect cables that pass through holes cut into panels. They can be used for many applications such as protection for electrical harnesses, air, water and hydraulic hoses, cables and control rods. The naturally smooth and hard wearing features of Nylon make it ideal as a substitute for rubber grommets. Hole plugs are equally at home under the bonnet or on the dash of a vehicle. They are a quick, inexpensive and durable solution to fill or cover unwanted holes and they blend into the application with an O.E.M. finish
