

GLOBE HOLDERS & PLUGS

Globeholders with universal applications can often be adapted to fit or repair a large range of housings where the genuine replacement option is either too costly to buy or too costly to install. Ceramic globe plugs are designed to resist the high running temperatures of halogen globes without melting or distorting. Also see our Narva catalogue for more.

18011

Globe holder suit BA15s globes

18012

Globe holder suit BAY15d globes
