

WIRING TOOLS

When crimping terminals to cable it is important that the tool, terminal and cable size are all matched to make a reliable connection. Under-crimping leaves voids within the crimp that promote intermittent loose connections while producing high resistance and heat. Over-crimping damages the terminal and tool and adds nothing to the reliability of the connection. Crimping, when done properly, is simpler, safer and superior in performance to soldering.

16120
Copper tube hex crimper.
Crimps lug sizes 10mm²
through to 120mm²

16202
Ratchet crimper suit many open barrel terminals
such as 6.3mm, 8mm and 9.5 mm tab types.
Rubberised plastic handles.

16272
Crimper/cutter/stripper.
Light duty trade tool.
Crimps pre- insulated
terminals.
Hard handles.

16203
Ratchet crimper suit red, blue & yellow standard
pre-insulated terminals.
Rubberised plastic handles.

16206
Ratchet crimper suit ferrules
and bootlace terminals 0.5mm² up to 10mm².
Rubberised plastic handles.

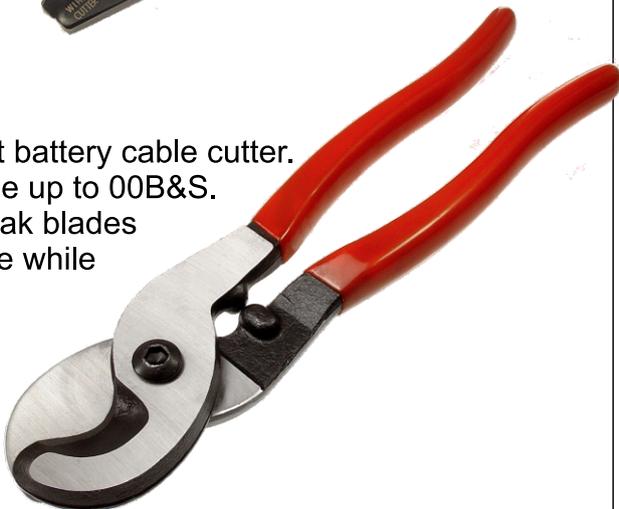

16200
Crimper/cutter/stripper.
Heavy duty trade tool.
Crimps pre- insulated
terminals.
Soft handles.

16207
Ratchet crimper suit some smaller open barrel
engine bay type terminals. Also crimps Superseal
terminals and seals in one action.
Rubberised plastic handles.

16208
Ratchet crimper suit heatshrinkable butt connectors,
closed barrel crimp terminals & small cable lugs up
to 10mm².
Won't pierce heatshrink when crimping.
Rubberised plastic handles.

56515
Shear cut battery cable cutter.
Cuts cable up to 00B&S.
Parrot beak blades
hold cable while
cutting.

16209
Ratchet crimper suit Weatherpack
terminals and seals in one action.
Hard plastic handles.

TESTERS

A range of inexpensive test gear. The mini multimeter is ideal where expensive bench models could be subject to damage or loss when moved from job to job. The probe type circuit testers provide quick and easy indication of voltage. LED testers should be used where there is a possibility of encountering logic (computer) circuits.

16905

Mini 19 range digital multimeter

- Large 3.5 digit 1999 count LCD display
- Switchable display backlight
- Data hold function
- K-type temperature probe
- Continuity checker (buzzer @ <math><200\text{Ohm}</math>)
- Transistor tester (hFE)
- Rubber holster and carry pouch for probes
- DC voltage: 200mV; 2000mV; 20V; 200V; 600V;
- AC voltage: 200V; 600V
- DC current: 200 μ A; 20mA; 200mA; 10A
- Resistance (Ohm): 200; 2000; 20k; 200k; 2000k
- Temperature: -20 $^{\circ}$ C to +137 $^{\circ}$ C \pm 1%
- Protection: 500mA and 10A M205 fuses
- Requires 9V battery

16903

Probe set suit most common meters with banana jacks for meter connection. Molded jacks and probes and shrouded jacks.

16601

Light duty 6-12V circuit tester. Uses a 24V BA9s globe.

16602

5-28VDC LED circuit tester. Computer safe - draws less than 21mA @12VDC. Polarity sensing - red/green LED.

16603

- 3-28VDC LED cordless circuit tester.
- Grounding is made by simply touching any painted or plated grounded metal surface - no ground lead required.
 - Computer safe - almost zero loading on test circuit.
 - Audible (buzzer) and visual (LED) indication.
 - Supplied with v-groove cable spike protector.
